

Birth Details

Name of the Baby: B/b SURETHA SHEET
 Name of the Hospital: ALPINE Branch: OML City: CHENNAI
 Date of Birth: 16.12.2023 Time of Birth: 22:01
 Obstetrician's Name: Dr. SATHYA

Maternal Information

Mother's Name: MRS. SURETHA SHEET
 Blood Group: AB the Anti D given: Yes / No
 Pregnancy complications: G. HYPERTENSION
 Delivery: Vaginal delivery / Vacuum Extraction / Forceps / Elective LSCS / Non-elective LSCS FTN dia tre
 Partner present at birth: Yes / No
 Intra / Post partum complications: _____

Neonatal Information

Estimated gestation: 39th Weeks Apgar 1 minute: 8 5 minutes: 9
 Abnormalities noted at birth and problems requiring treatment: MA/S4A
 Birth weight (kg): 2.640 Birth length (cm): 47 Birth head cir. (cm): 33
 Vitamin K given: Injection Yes No mg Oral 1st dose: _____ 2nd dose: _____ 3rd dose: _____
 Feeding at discharge: Breast / EBM / Formula: _____
 Difficulties with feeding: _____

Date of Discharge: 19.12.2023 Discharge Weight (kg): 2.480 kg H.C. (cm): 33
 L (cm): 47
 Signature: [Signature]
 Designation: [Signature] Date: 19.12.2023

Dr. RUMAIZA SALEEM
Regd. No. 53654

Conjugate Vaccine (PCV) - there are currently 3 vaccines available in the world and is mandatory in most developed countries because of its benefit. The first one is called Prevnar13 (Wyeth) containing 13 serotypes and the second one is called Synflorix (GSK) containing 10 serotypes & the third one is called Pneumasil (Serum Institute of India) - they cost Rs. 3,805, Rs. 1,499 & Rs. 1,999 per dose respectively at the time of printing of this booklet and you will have to choose one of them for your baby and your Paediatrician can advise more details if required.

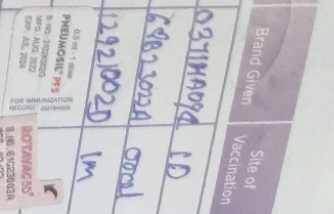

Rotavirus affects rich and poor equally by causing vomiting and diarrhea - hence it is called a Democratic virus! In serious cases it can cause death due to severe dehydration. Thanks to the vaccines we can protect our children from this deadly virus. At the time of printing this booklet there are 4 brands of this vaccine - Rotarix (GSK, UK) - 2 doses required; Rotated (MSD, USA); Rotasure or Rotavac (Bharat Biotech, India) & Rotasil (Serum Institute of India) - 3 doses for complete immunization. The choice of the vaccine is entirely left to the parents - but the brands should not be generally interchanged for better protection. WHO has pre-qualified all these vaccines for routine use.

Other optional vaccines are: Meningococcal vaccine, Japanese B encephalitis vaccine, shingles vaccine, Yellow fever vaccine, and cervical cancer vaccine. If you need more information on these, please discuss with your Paediatrician.

Cloudline we keep a record of all the vaccines given to your baby including the batch numbers, which may be required at times. Also we use vaccines without mercury as per international norm, if you have any further questions, don't forget to ask your Paediatrician.

It is important to note that the vaccines need to be stored in a particular temperature ALL the times. India being a developing country, there are power failures & power fluctuations - please ensure that wherever you get the vaccines, they have enough power back up to protect the vaccines, otherwise the vaccines may be spoiled!

Age Recommended	Vaccine	Batch No.	Date Given	Brand Given	Site of Vaccination
Birth	BCG				
	Oral Polio Vaccine				
	Hepatitis B vaccine				
	DTPw/DTap				
	HiB				
6 weeks (to up until 8 weeks)	Hep B				
	IPV				
	Pneumococcal				
	Rotaviral				
	DTPw/DTap				
10 weeks to 12 weeks	HiB				
	Hep B (+/-)				
	IPV				
	Pneumococcal				
	Rotaviral				
14 weeks (Preferably 16 weeks to avoid repeat HepB vaccine)	DTPw/DTap				
	HiB				
	Hep B (+/-)				
	IPV				
	Pneumococcal				
6 months	Rotaviral				
	(Influenza)				
	Oral polio vaccine				
	Hep B (+/-)				
	IPV (+/-) If not given at 6 & 14 weeks				
Discuss Dental care
